### Species Requirement

The response to the rejections made of record in this application on September 12, 2000 in this CPA application have been duly noted, however, the following office action is directed to a species requirement.

Claims 5, 33 and 48 are generic to a plurality of disclosed patentably distinct species comprising:

Species A: Liquid phase carriers which do not contain 2'-deoxythymidine-3'-O-yl ; and

Species B: Liquid phase carriers which contain 2'-deoxythymidine-3'-O-yl.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication should be directed to James O. Wilson at telephone number (703) 308-4624.
